

Kung Flu

GAMEPLAY OVERVIEW:

- Description: Guide Donald Trump through a course infested with patrolling coronavirus troops. Use Trump's magical Kung Fu moves to punch the coronavirus troops to death. Get to the finish line without being touched by the coronavirus three times. A power-up will appear on the map once each game. Grabbing this power-up will cause Donald to inject himself with a bottle of bleach, rendering him invincible to the coronavirus for the next 10 seconds.
- Win Condition: Reach the end of the stage without losing 3 health points to the coronavirus.
- Lose Condition: You lose once three coronavirus troops have touched you or if you fall off the course.

CONTROLS:

- **A-** jump
- **B-** magical punch
- **Left/Right-** move left or right on the course
- **Start-** pauses game and goes to a pause menu with a restart button and where score/remaining health is shown

AUDIO:

- Menu music: patriotic song
- Game music: Eye of the Tiger
- Pause music: same patriotic song from menu state
- Jumping sound: audio clip of trump saying "China"
- Punch sound: audio clip of Trump saying "you're fired" or "loser"
- Lose state music: sad game over music
- Win state sound: audio clip of Trump boasting about his negative covid test results

GAMEPLAY DETAILS:

- Health: Player starts with 3 health points (shown as three hearts on the top left side of the screen). Player loses a heart each time he is hit by a coronavirus troop. If the player falls off the course (like in Mario), he will die instantly.
- Power-Up: Injecting the bleach causes Trump to increase in size, letting the player know that he is now invincible. Touching any virus during this time will instantly kill the virus. Falling off the course will still kill Trump. I will try to implement sprite images that show trump injecting himself with a syringe when he grabs the power up. The power up will disappear if/when Trump touches it
- Punching- punching a virus will kill that virus and add to the player's score (which will be shown in the top left corner). I will try to make the virus appear to blow up when Trump punches it.
